

Opening Bids, Tabulation and Displaying Bid Results

The Information below will be helpful during bid openings. There are usually three components to this process.

1. Opening the bids
2. Displaying the results publicly
3. Accessing the bid tabulations and reviewing support documents

Important Note: After the Bid Opening date and time, there is absolutely nothing the posting agency, the bidders or the PennBid office can do to modify or change anything submitted by a bidder.

After logging in, click on Solicitations, select Pending Award from the dropdown and click Apply

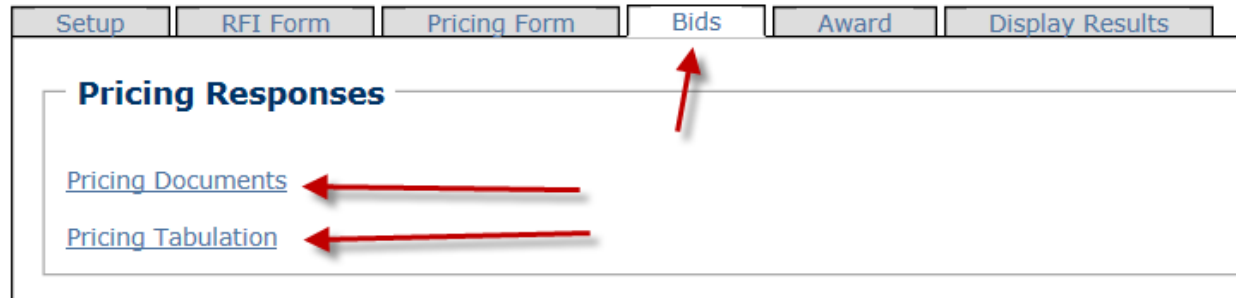

All functions dealing with Bid Opening, Tabulation, and Displaying Results start by clicking the **Bids** tab, then...

Unlock the Pricing and RFIs (if any)

Click on the small “Bids” tab then either **Pricing Tabulation** or **Pricing Documents**

Pricing Tabulation provides information related to the cost elements of the solicitation.

Pricing Documents provides access to all support documents (Bonds, non-collusion affidavits, etc.) provided by each bidder.

Below is example of Pricing Tabulation.

Bid Results will instantly display for public

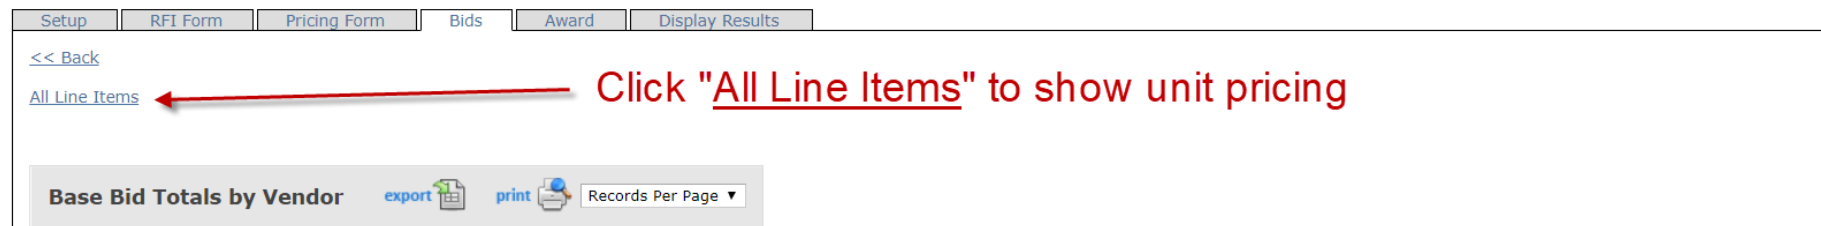

Note – In order to display results publicly, both the Pricing and RFIs must be unlocked.

Selecting “Bid & Award Data” will show only the names of companies who bid, along with their total Base Bid price (not including unit pricing, alternate/deducts or other items not categorized as part of the Base Bid).

As some agencies prefer displaying a complete tabulation of all bid items received, some additional steps allow each agency to customize what information is displayed.

First, clicking on the “All Line Items” button will change the tabulation view to include unit pricing:

This will alter the tabulation and include unit prices for each line item.

Sorting/organizing the information by various categories allows for presenting the tabulation in the desired manner:

When viewing unit prices, sorting/organizing by various categories can be helpful
