

EXTRACTING UPLOADED BIDDER DOCUMENTS

Bidders upload one or more supporting documents with each bid submission. Within PennBid, you can download individual support documents, or all support documents submitted by each bidder during or beyond bid opening. To retrieve a bidders' document(s), click on the "RESPONSE" tab and scan the grid of data until you see "Bid Submissions."

Within the "RESPONSE" tab, on the right side of the page next to the gear icon on the light blue toolbar, there is an "Export Documents" button. Once you click "Export Documents," the supporting document(s) for all bidders will automatically download as a ZIP folder on your computer.

Note: This does not include the bid bond(s), which will need to be exported individually as noted below.
